SWINGO®

SWINGO®-60

The perfectly designed cart system in wood/plastic

SWINGO®

Das System:

SWINGO®-60

The perfectly designed cart system in attractive wood/plastic. White with any decorative color. Tray width: 60 cm

SWINGO®-60 clinic

The elegant, sturdy metal cart system. Ideal for device combinations. Tray width: 60 cm

SWINGO®-45

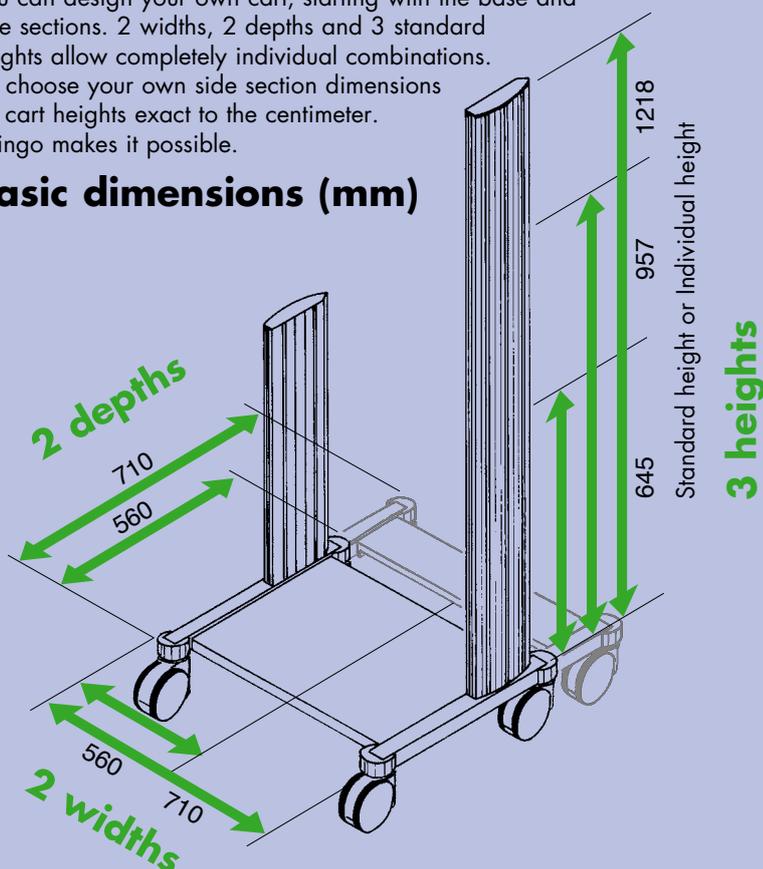

SWINGO®-45 clinic

The carrier system with the ideal shape. Tray width only 45 cm. Extra strong for narrow device combinations. wood/plastic or entirely of metal.

Completely flexible right from the start

You can design your own cart, starting with the base and side sections. 2 widths, 2 depths and 3 standard heights allow completely individual combinations. Or choose your own side section dimensions for cart heights exact to the centimeter. swingo makes it possible.

Basic dimensions (mm)

cart systems ...and more

The attachment column

An outstanding feature of swingo® carts is their finely worked aluminum attachment column with integrated cable duct and guide grooves for easy, stepless adjustment. Quadruple mounting provides extra support for expensive devices.

Great design

Created by Fuchs Design Stuttgart, the swingo® cart system for clinics and physician's offices are highly functional products of the finest quality. They add just the right color highlight as they keep things moving in the examining room. The patented design of swingo carts, along with perfect craftsmanship and highest quality materials make them easy to combine in an endless number of ways.

The handles

Functional and sturdy. Extremely elegant. Be sure to order the handles together with your cart.

The cable duct

Integrated in the attachment column. Keeps cables safe and tidy.

The castors

Smooth-action castors, Ø 100 mm, 125 mm or 150 mm, with or without brake, also electrically conductive.

The colors

Choose just the right vibrant color to highlight your office decor. Be sure to order handles, too: ref.no. 1380*. Just add the color code to the reference number.

- 1 = grey
- 2 = blue
- 3 = red violet
- 4 = yellow
- 5 = turquoise

clinic

swingo®-clinic-60

The elegant
metal cart system

The system:

- ✗ The sturdy, non-twisting metal construction guarantees high load-bearing capacity (130 or 250 kg).
- ✗ The trays and drawers are made of galvanized, high-quality plated sheet steel. They are resistant against disinfectants, easy to clean and non-fade. Color: easy-clean grey-white, RAL 9002.
- ✗ All trays are 22mm, strong and very stable. They are fixed twice on two sides preventing unwelcome inclination of the trays caused by high loading. Tray surface load: up to 50 kg.
- ✗ The strong aluminum carrier unit offers limitless possibilities for fixing system parts and all kinds of accessories.
- ✗ The integrated cable duct avoids cable chaos.
- ✗ Drawers with modern, fully extensible telescopic guides assure high handling comfort. The highlight: the front of the drawers can be easily removed for disinfecting and cleaning. Drawer surface load up to 30 kg.
- ✗ High-quality, smooth-action castors in three sizes (Ø 100, 125 or 150 mm) guarantee easy manoeuvrability of the cart even when fully loaded.
- ✗ The elegant design and vibrant colors give the swingo® clinic a distinctive appearance. The handles and decorative strips are available in 5 stylish colors: blue, red violet, yellow, turquoise and grey.
