8306

LFM medical

DESIGN: LUXO

The low heat output of the lamp and the versatility and robust construction of LFM medical makes it a great tool for patient examination and treatment at a very competitive cost.

TECHNICAL INFORMATION 8306 LFM medical

LFM has several features for additional patient safety including safety fuses on the primary side. LFM medical is approved as a medical device according to IEC 60601-1 and IEC 60601-1-2. The magnifying head is made of ABS polymer, combining light weight design with high impact strength. The $\varnothing 127$ mm glass lens is positioned in the middle of the circular tube, the ideal way of illuminating an object, virtually eliminating shadows.

A hinged lens cover is standard; it acts as a dust cover and prevents the lens from inadvertently turning into a burning glass. It is removable when not required. A transparent tube protection cover, made from rigid polycarbonate is standard. For additional magnification, secondary lenses can be fixed to LFM medical in seconds.
