LFM 101

DESIGN: LUXO

The versatility and robust construction of the LFM is acknowledged around the world for a wide variety of users. It combines high specifications with functional design, resulting in a long product life.

TECHNICAL INFORMATION 8310 LFM 101

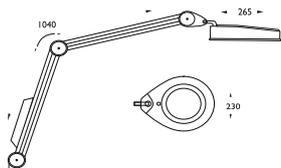

While primarily intended for industrial uses, the LFM adapts equally well for domestic use. The magnifying head is made of ABS polymer, combining lightness with high impact strength. The 22 Watt energy saving circular fluorescent lamp provides a high light-output with a minimum of heat. The $\varnothing 127$ mm glass lens is positioned in the middle of the circular tube, the ideal way of illuminating an object, virtually eliminating shadows. A hinged lens cover is standard; it acts like a dust cover and prevents the lens from acting like a burning-glass. It is removable when not required. A transparent tube protection cover, made from rigid polycarbonate is standard. For additional magnification, secondary lenses can be fixed to LFM in seconds.
