We've just shortened the distance between good patient care and good value.

To really care for people, you must understand the patients you care for today... and tomorrow. And with an increasingly aging population, your patients may need assistance in accessing an exam table. With an incredible 18-inch low height, the Ritter 222 & 223 Barrier-Free Power Exam Tables make it easy for your practice to accommodate the elderly, expectant mothers or patients with disabilities, easily and efficiently, helping them help themselves.

222 & 223 Barrier-Free

Accessibility and Dignity for All Your Patients

Getting on an exam table can be an anxious, insecure moment, especially for elderly and special needs patients. The Ritter 222 & 223 Barrier-Free Tables lower to 18 inches from the floor, making it easier for patients to get on the table... eliminating excess strain on their backs, as well as, the backs of physicians and staff. This low height means patients can get on the table with no or minimal staff assistance, helping them maintain their dignity.

Measuring 37 inches in the highest position, the Ritter Barrier-Free tables also have the absolute lowest and highest height combination on the market, making exams more comfortable. This maximum low and high height also eliminates excess bending and stooping to help your patients onto the table surface, once again minimizing stress and strain on the backs of physicians and staff.

Once a patient is on the table, with a touch of the foot control, the Ritter Barrier-Free tables allow precise and smooth patient positioning with minimal effort on everyone's part. And, that goes a long way toward helping your patients – and you – feel relaxed.

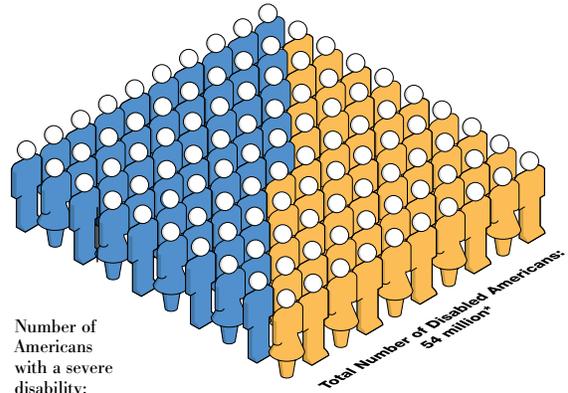

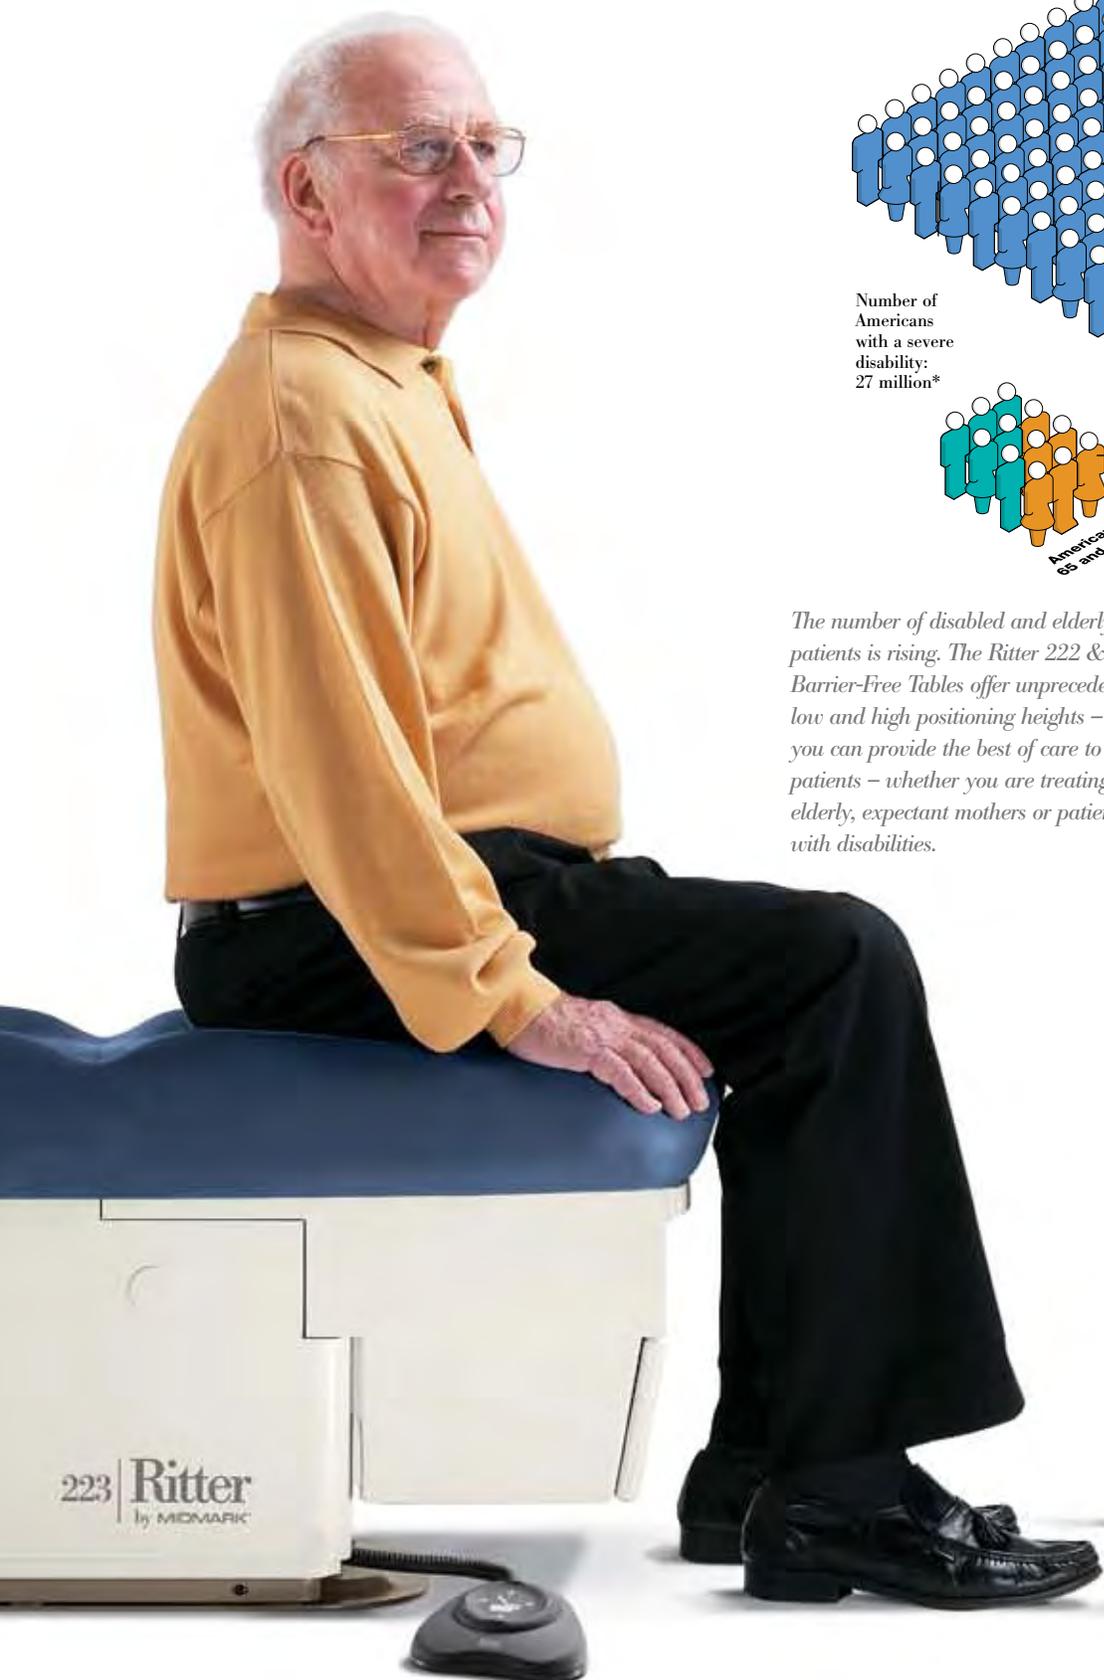

The Ritter 222 & 223 were designed with you, your patients and staff in mind. Its 18-inch low height helps the patient move onto and off the table faster, easier and safer.

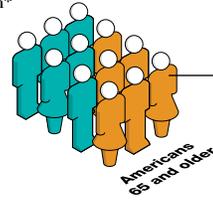

The 37-inch full height and optional pelvic tilt enables you to conduct an exam or a pap smear without stressing your back.

er-Free™ Tables

Number of Americans with a severe disability: 27 million*

Percentage of Americans over 65 with some form of disability: 50%*

The number of disabled and elderly patients is rising. The Ritter 222 & 223 Barrier-Free Tables offer unprecedented low and high positioning heights – so you can provide the best of care to all patients – whether you are treating the elderly, expectant mothers or patients with disabilities.

The Right Thing to Do — For Your Patients and For Your Practice

Gone are the days of limited exam rooms for disabled patients. With the Ritter Barrier-Free tables, more of your exam rooms can be accessible to your special needs patients. This not only puts your patients at ease, but it also makes your practice more efficient.

Of course your staff will love the Ritter 222 or 223 more than anyone. An examination table that lowers to 18 inches from the floor means they don't risk injury from lifting patients. Ease of use and accessibility also mean increased efficiency and an overall increase in patient throughput.

Designed in Collaboration with Experts — You

You've been asking us for a truly disability-accessible table. We've taken your advice, and done one better: we asked disability experts and disability advocacy groups to offer their opinion, too. Developed in conjunction with these experts, the Ritter Barrier-Free tables – the only tables of their kind – reduce the likelihood of distress and injury to patients who might have difficulty moving on and off an industry standard box exam table. The 222 features a manual gas spring assist back and the 223 back section is fully powered.

The New Industry Standard

Box-style exam tables have been the industry standard in exam rooms for over 50 years, however they are inaccessible, uncomfortable and inefficient. The choice is clear... the Ritter Barrier-Free tables are the new industry standard with powered height and features that are functional and efficient... so why settle for anything less in your practice? The Ritter 222 & 223 Barrier-Free Power Examination Tables are everything you could ask for, at a price you can afford.

Storage needs - Ritter Barrier-Free tables provide space for up to four paper rolls. An optional rear storage pod provides extra room for supplies, such as disposable gowns and drapes.

Both tables offer a stylish, simple to use foot control. The Ritter 223 control allows simultaneous movement of the base and back section promoting efficiency.

Removable Upholstery Top

The Ritter 222 & 223 allow patients to feel more stable and relaxed while they're waiting or during their consultation, as their feet rest comfortably on the floor.

Box tables, even with the step pulled out, suspends patients feet, resulting in an uncomfortable, unstable situation.

Ritter 222 & 223

The Ritter 222 & 223's Exam Assistant Drawer System™ provides an area to store basic pelvic and examination supplies at your fingertips. Its unique fold-down front can also turn into a work shelf for examination assistance. This makes the exam easier and more efficient for you.

Ritter 222 High-Low Power Examination Table

Features

With unprecedented low and high positioning heights, the Ritter 222 has a gas spring assisted back section with an easy access backrest mechanism, while the Ritter 223 has a power back system. Both have built-in pillow, hideaway stirrups that lock in one of four lateral positions, foot extension shelf to expand the table length, paper roll holder hidden under headrest, storage for four 21" x 3.5" diameter paper rolls, polystyrene treatment pan, foot control, Exam Assistant Drawer System™ and leveling screws

The Ritter 222 & 223's unique arm system accessory gives your patients a stable platform to assist them in getting onto the table.
