keo® by HAEBERLE

– the flexible and creative functional trolley generation for medical applications

HAEBERLE's trolley system **keo®** opens new dimensions for form and functionality conscious people. With their mobility, flexibility and attractive design the ergonomic functional trolleys really provide practical solutions. A new order concept provides uncluttered work surfaces. With the **keo®** system you are able to create almost any types of functional trolleys in a standardised design for your clinic. With its drawers, module full-pull-outs or elegant roller blinds of various heights, **keo®** optimally adapts to your furnishing ideas and your modern ambience. Flexible module support walls enable accommodating ISO module baskets of all conventional makes – even at a later date.

keo® as supply trolleys, anaesthetic trolleys, ward trolleys, module trolleys, dressing trolleys, emergency trolleys ...

the technology:
- A rugged, torsionally stiff sheet metal construction of galvanized, high-quality, coated sheet metal. Resistant to disinfectants, easy to clean and light-resistant. Free of drumming due to single-tray construction. Very low weight!
- 4 elegant, anodised aluminium support profiles for mounting accessories. Subsequent mounting of accessories is also possible.
- An elegant, anodised aluminium push handle is standard.
- All module full-pull-outs are provided with an inset frame suitable for all conventional ISO module baskets. The pull-out is extendable up to approx. 110%, so that the module contents are comfortably and easily removable.
- Drawers are equipped also with full-pull-outs (110%).
- Inset frames and drawers with ball bearing telescopic guidance with self pull-in for easy gliding and comfortable use.
- High-quality, Ø 125 mm, smoothly-running castors with 2 brakes and with wall guards are standard. Electrically conductive castors are available at an additional price.
- Total load of the trolleys up to approx. 130 kg.

the colours:
Trolley colours: grey white RAL 9002, night-blue RAL 5022, white aluminium RAL 9006. Drawer modules and module full-pull-out handles and decorative strips are available in: grey, blue, red violet, yellow and turquoise. We are pleased to offer other colours on a project basis.

the dimensions:
Case width: (incl. castors and wall guards) .... 770 mm
Case depth: (incl. castors and wall guards) .... 580 mm
Case height, (incl. castors) .... 918/1.041/1.169 mm
Overall width (incl. 1 push handle and wall guards).... 810 mm

## Function trolleys for ISO modules

Recommended combinations, which can be supplemented or altered whenever necessary. **All functional trolleys are delivered fully assembled at no additional cost.** The price includes the elegant push handle.

keo® ISO module trolleys

The keo® ISO module trolleys are suitable for all conventional ISO module systems. You can choose between the more comfortable module full-pull-out frames, which can be extended to 110%, or module support walls. We have compiled a selection of functional trolleys for you. Using the various system and accessory components you can at any time put together your very own special model customized to your requirements. **The modules are not included in the presented module trolleys. You can use your own module stocks or purchase modules from us.**

keo® Dressing and treatment trolleys

Treat yourself to clear work spaces. The new organisation system allows you to compactly store all common material packages and leaves the work surface free for your preparations. Two capacious, tilted deposit levels provided with adjustable clips provide room for all types of packages. Ergonomical placement, variable equipping. Work is a pleasure using the intelligently shaped and easy to clean work surface with its rounded corners.

## Roller blind / module support walls

Roller blind incl. 2 ISO module support walls

NEW

Roller blind made of high-quality plastic, aluminium colour with lock and handle, easy to clean. ISO module support walls made of grey plastic (ABS) to insert ISO modules 600 x 400 mm (w x d). **The ref.no. include the roller blind with ISO module support walls (right and left side)**

for 4 ISO modules, 100 - 110 mm high
suitable for case for 5 height grids   18844   448,– A
(ref.no. 18181.-.7 or 1841.1-.7)

for 5 ISO modules, 100 - 110 mm high
suitable for case for 6 height grids   18845   448,– A
(ref.no. 1879.1-.7)

for 7 ISO modules, 100 - 110 mm high
suitable for case for 7 height grids   18846   448,– A
(ref.no. 1819.1-.7)

The installation of a drawer or an ISO module full-pull-out 125 reduced the number of deployable ISO modules.

If you use different heights of ISO modules you can put in more or less ISO modules. **Pleas contact our team of consultants.**
